

Safety Stand-Down

Facial Covering

The CDC is advising the use of simple cloth face coverings to slow the spread of Covid-19 and help people who may have the virus and do not know it from transmitting it to others. Cloth face coverings fashioned from household items or made at home from common materials at low cost can be used as an additional, voluntary public health measure. Our employees will not be asked to wear respirators. Bandanas, scarfs, and neck gaiters like those shown here would all qualify as an appropriate face covering. Neck gaiters are being used by many employees.

The idea behind a face covering is to prevent the liquid droplets from someone sneezing, coughing, or breathing from being transmitted to others. Employees should be reminded that any kind of face covering must be washed on a regular basis to remove germs. Employees are encouraged to cover their faces per CDC recommendations.

The use of face coverings do not replace other critical preventative measures that need to be followed on our sites. You must continue to maintain 6-feet social distancing when working as this will help to slow the spread of the virus. This means **WORK TOGETHER – STAY APART!**

REMEMBER it is important that people stay home if they are sick and they must continue practicing good hygiene. Employees must avoid sharing tools, they must disinfect tools daily, maintain separation during breaks and lunch.

(Note: Have each person present sign the back of this form.)
